6 1/2"	952.00	an6-12-500

This is the highest (1/2") crown on the market. No other company to our knowledge has one this high. Crowns do not have wide water ways as you can see. We can and do cut as many water ways as you need. This enables you to core thru pre-cast concrete cables or steel rebar without tearing off the segments like on a standard core bit. It cores slower than a conventional core bit because of all the "bearing" surface we have here. Will core cured concrete, marble, granite, slate, flagstone, blue stone and other components we are not at liberty to divulge.

Prices are subject to change without notice due to freight and inflation costs
 We reserve the right to ship next higher quality product if we are out of stock
