All above blades are laser welded and designed for EARLY entry of green concrete. These blades are designed specifically for this purpose – correct time of entry is critical.

Most all sizes we stock are in two bonds: soft and hard. Please consult with us as to horsepower limitations. Blade clearance problems may require half sizes.

The true cost of your blade is the inch feet the blade cuts vs the cost you pay for it. We feel our blade is one, if not the best, values on the market today.

Our Bit N Blade Extender will double the life of the blade.

Prices are subject to change without notice due to freight and inflation costs.  
We reserve the right to ship next higher quality product if we are out of stock.
