36" x 395 x 187 x 1	2628.00	cdwbc3618s

Blades are designed for 35 to 82 hp saws. All are "laser welded". These are cured concrete. All have drop segments on the blade for undercut protection. In tests that we have run, a 24" x 187(p) will yield approximately 12,000 inch feet on a 35 hp saw. Keep in mind that all these blades are laser welded – a lot of them on the market today are silver soldered after 20".

You can purchase this professional blade for the same price as a low end blade. We have so many customers rave about our performance that we now only stock one blade. The footage is marvelous. 24" and below are .475 segment height. Why purchase a cheap blade with a short segment and hardly any diamond concentration? Why? Every blade has drop segment to save undercutting. Does your blade have this feature?

Prices are subject to change without notice due to freight and inflation costs. We reserve the right to ship next higher quality product if we are out of stock.
