BIT N BLADE XTENDERRR

- 50% longer blade life
- Faster cutting... easier cutting... cools on contact
- 50% less water consumption

Heat is the enemy of any diamond blade, core bit, grinding cup wheel or carbide bit. Whether drilling or chipping concrete, the life of the product will be extended considerably using this product.

When water is used, it takes 25 times longer to cool a blade down versus using BitNBlade Xtenderrr. A blade sprayed with BitNBlade Xtenderrr will take approximately 5-20 seconds to cool.

HOW?

BitNBlade Xtenderrr impregnates into the steel requiring that metal 20 times longer to get hot.

SKEPTICAL?

In a timed test, using 14" x 125 blades, cooling time:

1 blade sprayed with water:	20 minutes
1 blade sprayed with BitNBlade Xtenderrr:	10 seconds

Different thickness of blades, bits and cup wheels will vary the cooling time. Different types of water will vary the performance of the BitNBlade Xtenderrr

Sold in red-i-mixed spray bottles	22.00
1/2 gallon (non-diluted)	120.00
1 gallon (non-diluted)	228.00
5 gallon (non-diluted)	912.00
60 gallon drum (non-diluted)	8064.00

Recommended mixing: 1 part BitNBlade Xtenderrr to 100 parts water.
